MANN THAKKAR

Ahmedabad, India | mann.25434014@nsitifscs.ac.in | LinkedIn: linkedin.com/in/mannthakkar-06a8a4380

CYBERSECURITY STUDENT • APPLICATION SECURITY • SECURITY ENGINEERING

PROFILE

Cybersecurity student at NFSU focused on application security, network security and security engineering, with hands-on foundations in VAPT, SOC/incident response, Python, Linux and security research. Interested in building secure, reliable systems and solving practical information security problems.

Seeking an Information Security internship to apply cybersecurity foundations and contribute to practical security engineering problems.

EDUCATION

National Forensic Sciences University (NFSU) | B.Tech + M.Tech Integrated — CSE (Cyber Security) | Aug 2025 – Jun 2030

Academic performance: Semester 1 SPI 7.43 | Semester 2 SPI 8.16

Relevant coursework: Cyber Security, Digital Forensics, DSA, DBMS, Python Programming, Computer Networks, VAPT, SOC, Incident Response, Threat Intelligence, EDR, DevSecOps, AI in Cybersecurity.

TECHNICAL SKILLS

Programming: Python, C, C++, SQL/PL-SQL

Cybersecurity: Network Security, VAPT, Cyber Defense, Threat Analysis, SOC Fundamentals, Incident Response, Threat Intelligence, EDR, Digital Forensics, Password Security

Tools & Platforms: Nmap, Wireshark, tcpdump, Cisco Packet Tracer, Linux (Ubuntu), GitHub

Research: Password Entropy Analysis, Mathematical Modeling, Academic Research Writing

PROJECTS

SPAISS — Solar-Powered AI Smart Surveillance & Criminal Detection System | GitHub: github.com/Mann461/AgisNexus

- Designed a solar-powered, Edge-AI surveillance concept for remote/off-grid environments using an alert-first, video-second architecture to reduce bandwidth dependence.
- Integrated AI-based face detection/recognition, resilient communication and centralised monitoring for public-safety and connectivity constraints.

GSTR-1 vs e-Invoice Reconciliation & Compliance Web App | gstr1-vs-einvoice.onrender.com

- Built a web-based utility focused on comparing GSTR-1 data with e-Invoice records to support reconciliation and compliance workflows.
- Developed an interactive interface for uploading/processing records and surfacing reconciliation differences for review.

ACHIEVEMENTS

- Finalist — KANAD S.H.I.E.L.D. 2026, Team Cyber Warriors; served as Team Leader for SPAISS.
- Led problem conceptualisation, system architecture, technical development, team coordination and final presentation for the SPAISS solution.
- Hex Hunt 2025 — Cybersecurity Workshop & Capture the Flag (CTF), Participant.

LEADERSHIP & COMMUNITY

- **Student Team Member —** NSIT-SAMVAD Newsletter, Narnarayan Shastri Institute of Forensic Science and Cyber Security.
- Contributed as part of the student team behind the institute's first-edition newsletter, supporting a platform that showcased student creativity, innovation and institute activities.

RESEARCH & PRESENTATION

Paper Presentation — NCRTTM 2026 | 27 Jul 2026 | M. G. Science Institute, Ahmedabad

- Presented "An Adaptive Entropy-Based Mathematical Model for Evaluating Password Security Against AI-Attacks."
- Explored entropy-based password strength evaluation and mathematical modeling in the context of AI-assisted attacks.

CERTIFICATIONS & CYBERSECURITY ACTIVITIES

- ISC2 Certified in Cybersecurity (CC) — Domains 1–5 completed (Aug 2026).
- Cybersecurity Virtual Experience Program — Mastercard (Forage), 2025.
- Cyber Job Simulation — Deloitte (Forage), 2025.
- Getting Started with Cisco Packet Tracer — Cisco Networking Academy, 2025.
- AI Sentinel: Pioneering Cyber Security & Digital Investigation — GUJCOST-sponsored STTP, 2026; Volunteer.
- IEEE Computer Society — Graduate Student Member, 2026.

CORE INTERESTS

Application Security • Network Security • Security Operations • VAPT • Digital Forensics • AI in Cybersecurity • Password Security Research
